

Bridge Saw Blades

HURCULES BLADE - 15mm Solid Segments

The Hercules is manufactured in wide slots configuration with a diamond height of 15mm. This is a good balance between price and performance. A wide slots design allows for faster cutting, while a 15 mm segment height assures a good performance. This blade can be used on all types of granites. On harder types, the machine will need to have the speed reduced slightly.

Size	Min RPM	Max RPM
14"	1700	2200
16"	1500	1800
18"	1300	1600
20"	1100	1400

WINNER BLADE - 20mm Solid Segments

One of the best selling blades of Italdiamant. The solid narrow slot diamond configuration is set up to obtain a tremendous amount of work in terms of square feet also because diamond segments are 20mm tall. The cutting speed is around 8-10 ft/min and the consistent quality of this blade assures you a high performance. We recommend this version of Winner blade to be used on machines starting with at least 15HP. It can cut all types of granites.

Size	Min RPM	Max RPM
14"	1700	1900
16"	1500	1700
18"	1300	1500
20"	1100	1300

VEGAS BLADE - 12.5mm "W" Segments

The unique 12.5mm "W" design of diamond segments allows for extreme fast cutting of very hard material.

- Cutting depth up to 4 cm IN A SINGLE PASS!!!
- Speed: between 15 and 20ft/min
- Materials like Medium Granite and even a Pink Sardinia Granite.

Size	Min RPM	Max RPM
14"	1900	2100
16"	1600	1800
18"	1300	1500

TOWER BLADE - 18mm "W" Segments

The Tower blade has the same cutting characteristic but with an 18mm segment. Get the same cutting speed and power of the Vegas but with added life.

Size	Min RPM	Max RPM
14"	1900	2100
16"	1600	1800
18"	1300	1500

TNT BLADE - 19mm Solid and "W" Segments

TNT gives you the bang of the Tower with added life of a Winner blade. The alternating 19mm solid segments and "W" segments allow for superior cutting strength and life. This blade is Premium in terms of quality and price.

Size	Min RPM	Max RPM
14"	1800	2100
16"	1500	1800
